six pounds per acre for cleared farms. The land in the township is rolling, and the soil good; the timber, a mixture of hardwood and pine.

The ridge of land running along the border of the Niagara District, called the "mountain" was, in Governor Simcoe's time, by royal proclamation, named Mount Dorchester.

The agriculture of the district is improving, and the establishment of agricultural societies will stimulate the farmers to exertion that they may not be left behind in the race of improvement. The district received last year from the government grant two hundred and fifty pounds towards the support of its agricultural societies, and one hundred pounds towards a grammar school, besides its proportion of the amount granted for the support of common schools.

NUMBER of Common Schools in operation in the Niagara District, in 1847, with the amount of remuneration paid to Teachers.

Township.	Number of Schools.	Apportionment from Legislative School Grant.	Total Annual Salary of Teachers.
